INTRODUCTION TO DIGITAL ASSETS AND AI

DIGITAL INTELLIGENT ECONOMY - THE WEB3 ERA OF AI+RWA

The U.S. Stargate $500 billion plan vigorously builds AI computing power infrastructure;The Chinese government, in its 2024 Government Work Report, explicitly outlined plans to formulate policies supporting the high-quality development of the digital economy. It will actively promote digital industrialization and industrial digitalization, and foster the deep integration of digital technology with the real economy. Simultaneously, the report calls for deepening the R&D and application of big data, artificial intelligence, and other technologies, launching an "AI Plus" initiative, and building internationally competitive digital industrial clusters.

AGRICULTURAL AGE > **INDUSTRIAL AGE** > **INTERNET AGE** > **AGE OF DIGITAL INTELLIGENCE**
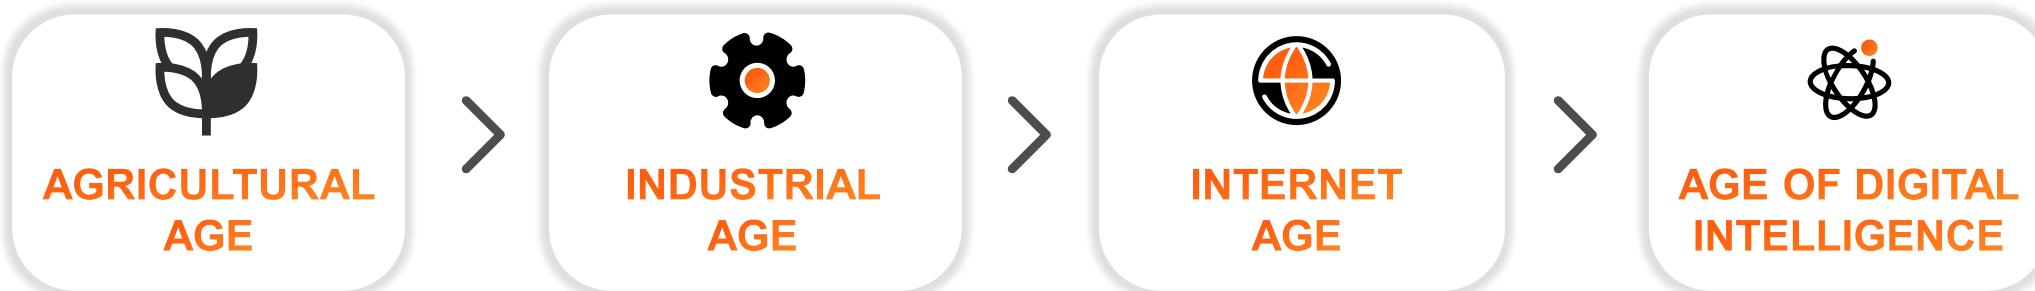

The U.S. $500 billion "Stargate" AI infrastructure project and Musk's 5-million-unit H100 supercomputing center.

RWA: The Passage of the GENIUS Act (June 17, 2025) and the Establishment of the First Federal Stablecoin Regulatory Framework in the United States

Hong Kong's August 1, 2025 Stablecoin Bill Announcement – with RWA as a financial bridge, this marks the global economy's official entry into the digital intelligence fast lane.

TIMES CHANGE, WEALTH MIGRATION

From the Agricultural Age to the Industrial Age, and then to the Internet Age, each technological revolution has been accompanied by a redistribution of wealth. In the Agricultural Age, wealth was concentrated in land; in the Industrial Age, it depended on the means of production; and in the Internet Age, data has become the most critical asset

PHYSICAL ASSETS

DIGITAL ASSETS

As AI, Web3, RWA, and DePIN rise, AI-driven asset data capitalization is emerging as the pivotal driver of a new wave of wealth migration. Seizing this wave will be a decisive factor in determining our position in the future digital economy.

The success of artificial intelligence could be the greatest event in human history

—— StephenHawking
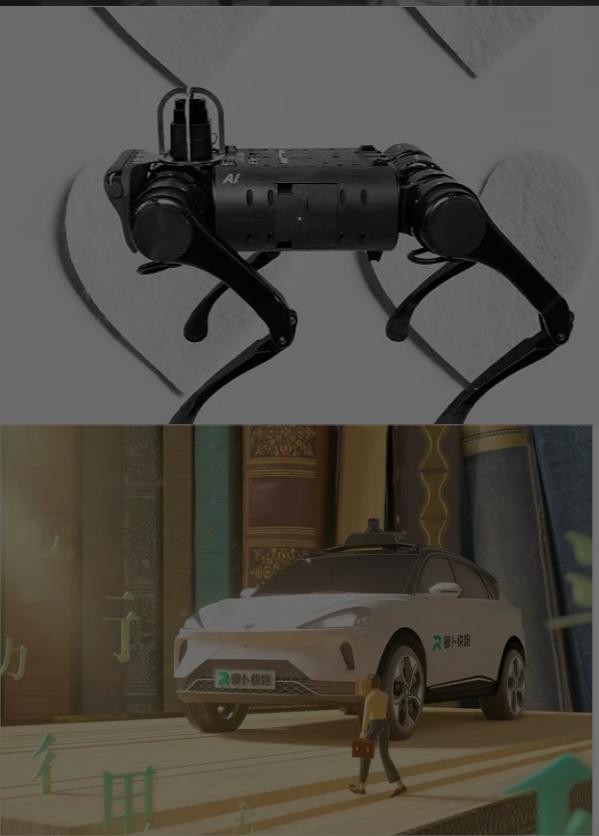

AGI MARKS AI'S LEAP FROM A "TOOL" TO A "HUMAN-LIKE PARTNER," FUNDAMENTALLY REDEFINING OUR ECONOMY, SOCIETY, AND CULTURE

GENERALITY

AGI (Artificial General Intelligence): Refers to a form of AI that can learn, reason, and solve problems across diverse domains, while also being able to navigate the social interactions of daily life.Distinction from ANI: Unlike ANI (e.g., voice assistants), which can only perform a predefined set of tasks, AGI exhibits intelligence that spans multiple domains and possesses the capacity for autonomous learning and adaptation.

POTENTIAL SELF-EVOLUTION

Through continuous learning and self-improvement, AGI could gradually approach or even surpass human intelligence, thereby laying the groundwork for the emergence of Artificial Superintelligence (ASI).

HUMAN-LIKE COGNITION

AGI not only mimics human behavior but also comprehends context, performs common-sense reasoning, and tackles novel, unseen problems. For instance, OpenAI's GPT series has demonstrated near-human reasoning capabilities in mathematical competitions like the International Mathematical Olympiad (IMO).

RWA

TOKENIZATION OF REAL-WORLD ASSETS

Blockchain endows assets with transparency, trustworthiness, and traceability, enabling them to circulate freely worldwide in a tokenized form. This allows assets to transcend geographical and institutional barriers, facilitating efficient value transfer and unlocking potential wealth dividends.

RWA is not merely an innovation in asset digitization, but a crucial bridge towards a more open and shared global financial system.

Through the RWA mechanism, real-world assets such as real estate, equity, and bonds are digitized and capitalized

THE GOLDEN AGE OF THE GLOBAL GOLD RUSH

The integration of AI-driven IP and RWA will dramatically enhance productivity, enabling individuals and micro-teams to extend their reach and impact across the globe. This marks the dawn of a worldwide gold rush era
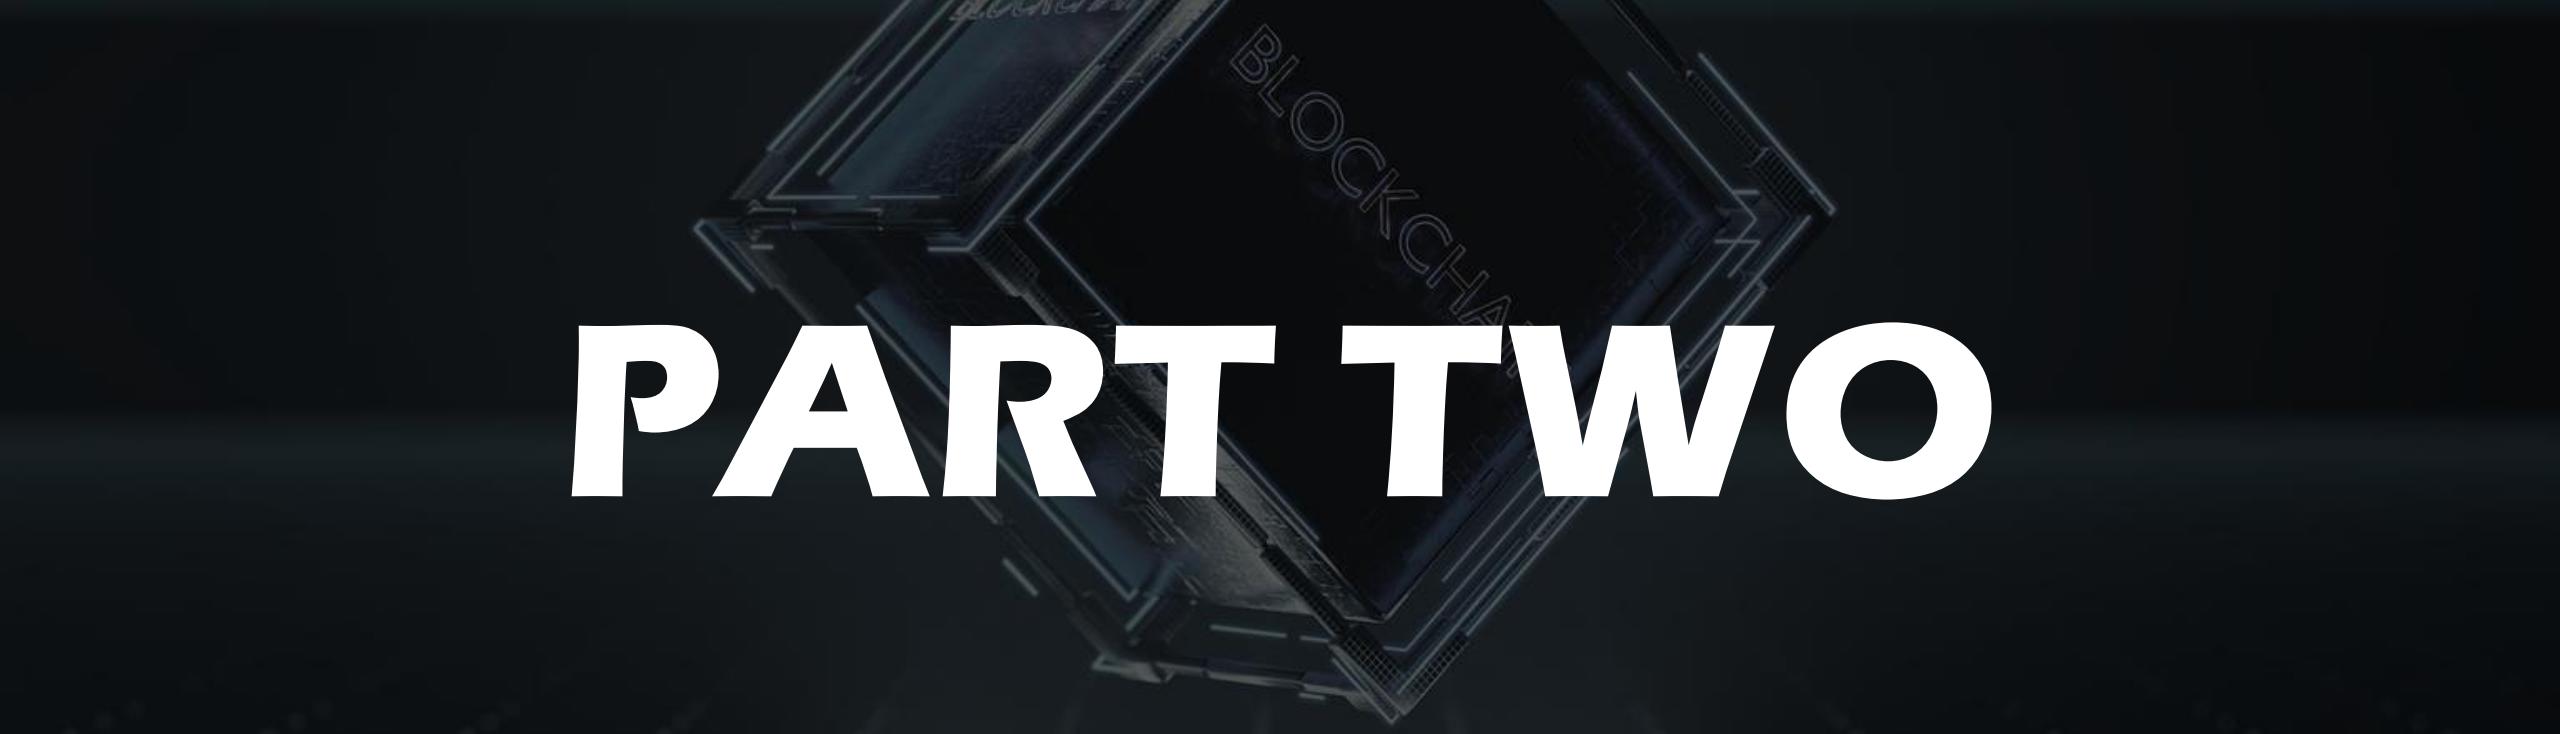

PART TWO

DAO INTRODUCTION

AI REVOLUTION DAO

——

AI Revolution DAO (Decentralized AI Revolution Autonomous Organization) is a next-generation organizational paradigm that integrates blockchain technology, distributed machine learning, and community governance protocols. By decentralizing the training, inference, and decision-making authority of AI models across a distributed network, it aims to address critical issues inherent in traditional AI systems, such as centralized monopolies, data privacy abuse, and algorithmic black boxes. Simultaneously, it is committed to building an open AI + RWA ecosystem that is co-owned and co-governed by a global community of participants

GLOBAL COLLABORATION

BUILD TOGETHER

PARTNERS

BACKGROUND AND PARTNERS OF AI REVOLUTION DAO

COMMUNITY CO-GOVERNANCE

The iterative direction and parameter adjustments of AI models are determined by voting by token holders.

DECENTRALIZED AI TRAINING

By leveraging federated learning and blockchain verification mechanisms, we achieve the paradigm where "data remains in place while models move."

VALUE SHARING

Participants who contribute computing power, data, or code receive ecosystem token rewards according to predefined rules

To Build A Permissionless, Transparent, Trustworthy, And Incentive-compatible AI Collaboration Network

DECENTRALIZED AI AGENT PLATFORM (AI REVOLUTION DAO)

In the fourth quarter of 2025, AI Revolution DAO will launch an AI 2.0 technology development platform and an AI agent + RWA launch platform. By integrating the needs of developers, investors, and users, it aims to create an RWA application ecosystem where everyone can participate and benefit.
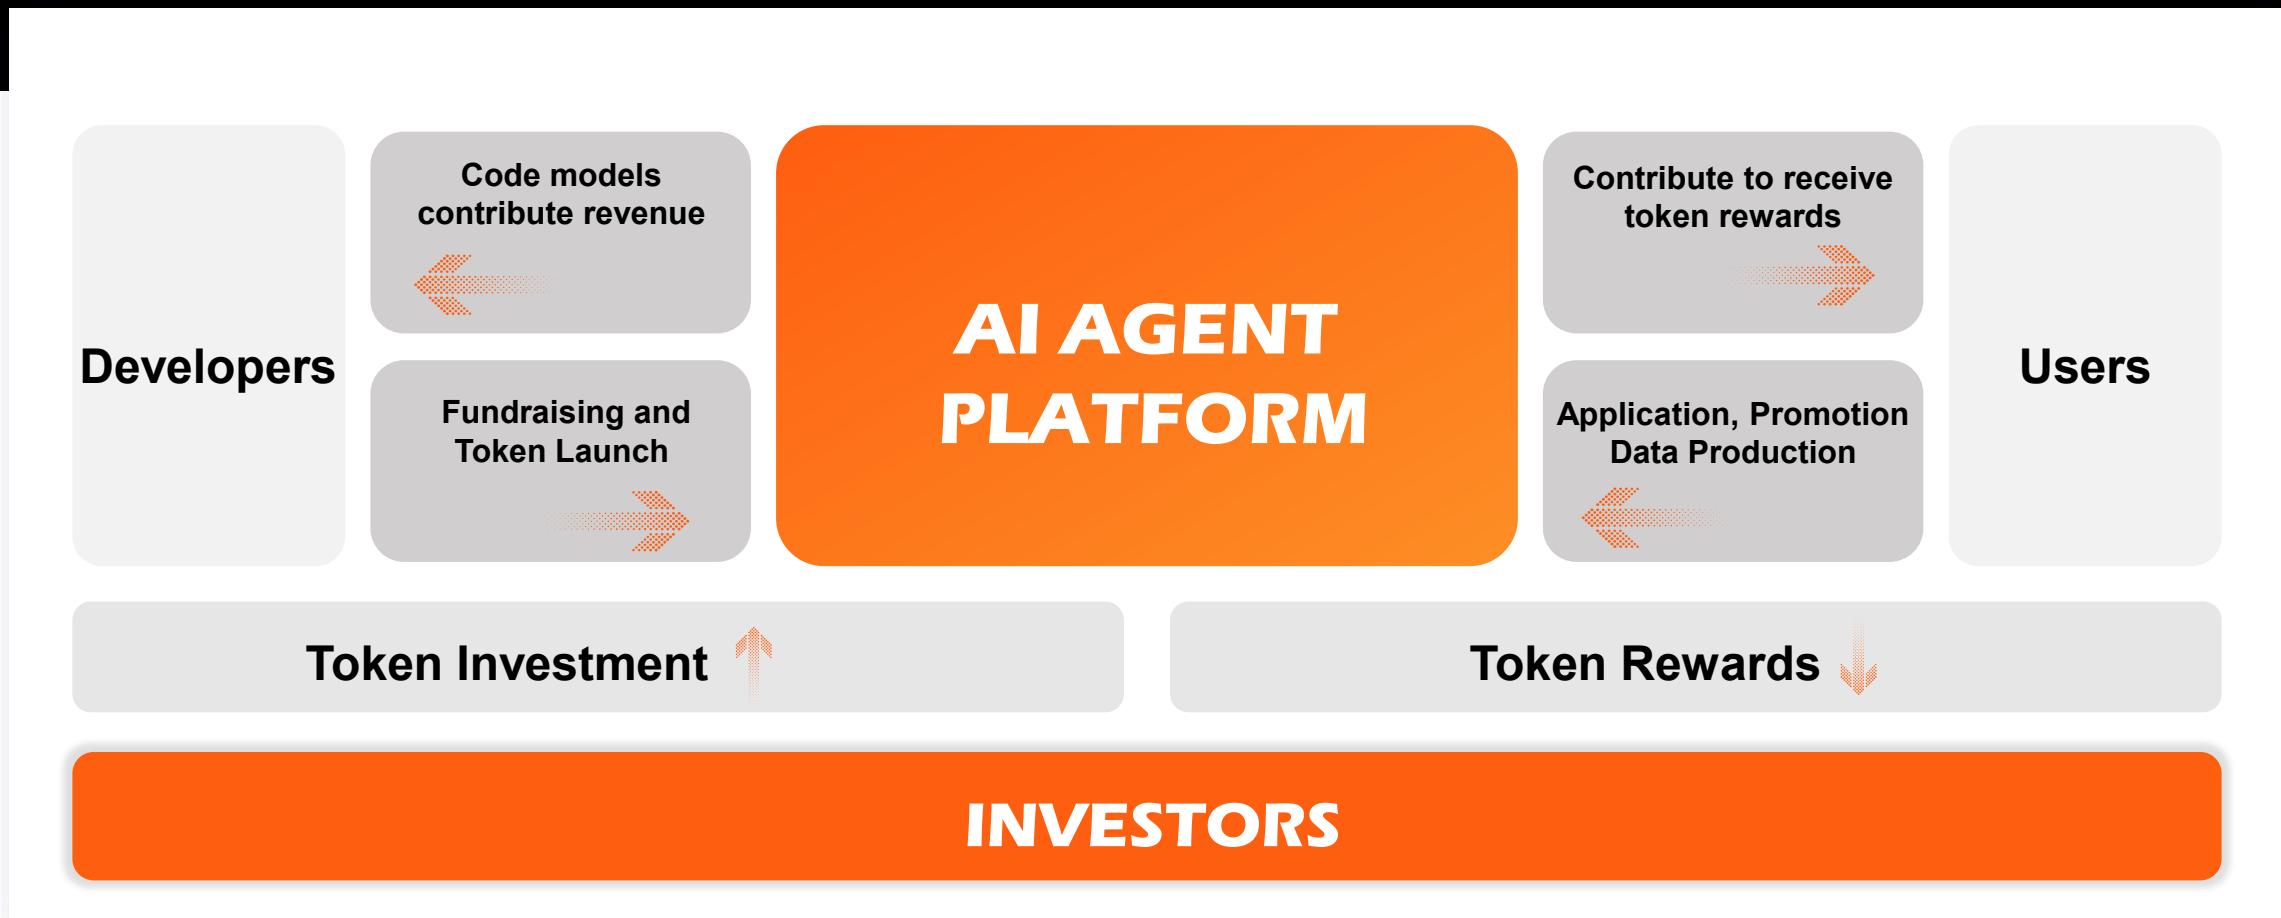

AI REVOLUTION DAO DIGITAL ECONOMY ECOLOGICAL MODULE

AI
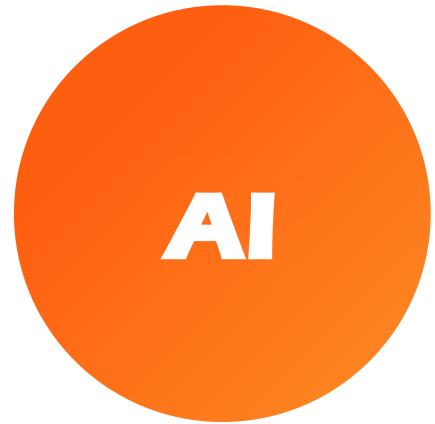

Improve production efficiency

WEB3

Change production relations

DEPIN

Link the physical world with the digital world

RWA

Digitization of physical assets.It is convenient for circulation and trading

The convergence of AI, Web3, DePIN, and RWA is poised to become the most significant technological trend of the next decade. AI empowers Web3, DePIN, and RWA by enabling practical applications, providing more efficient data analysis and user interaction, and creating a 1:1 mapping of the physical world to the virtual world, thereby facilitating circulation and trade. In return, Web3 offers AI a more transparent governance model and value distribution system, while DePIN and RWA digitize real-world assets for AI, making ownership verification and transfer seamless. The synergy of these four fields will catalyze new business models, such as decentralized AI service platforms and self-learning smart contracts. It will enable convenient services and fluid circulation of digital assets that mirror the real world, ultimately fostering a more open and collaborative digital ecosystem.

AI-DRIVEN SUPER BRAIN(AI REVOLUTION DAO)

MULTI-SOURCE DATA ENTRY

On-chain data
Wallet activity, smart contracts, cross-chain deployment

Public opinion text
News, social media, regulatory announcements

Handicap microstructure
Order book depth, large order splitting

Macroeconomic indicators
Central bank policies, economic data

ADVANCED MODEL ARCHITECTURE

Graph Neural Network(GNN)
Modeling relational networks

Reinforcement Learning (RL)
Adaptive optimization decision-making

Generative Adversarial Network（GAN）
Anticipate extreme situations

Multi-agent game system
Anticipate opponent behavior

AI Treasury Fund Three-Element Practice

Data-driven
Full-dimensional market, on-chain, and liquidity data

AI models
Statistics + Machine Learning + Deep Learning

Automated execution
Fully automatic position adjustment, risk control, execution, no emotion

Safe and transparent
On-chain and decentralized exchange execution, with secure and transparent funds

PART THREE

AI AGENT
INTRODUCTION

AI REVOLUTION DAO MULTIMODAL ROBOT

AI Revolution DAO will introduce multimodal agent robots and initiate a governance token minting plan to incentivize broader user participation and foster collective ecosystem growth

01

Users who provide liquidity and contribute to the AI Treasury Fund will be rewarded with AIREV minting rights and a DAO governance identity

02

Users who purchase AI applications using crypto assets will receive AIREV minting rights

AIREV: YOUR ON-CHAIN ADVISOR & TREASURY

Market Prediction + On-Chain Treasury Fund Management

Multi-Market Trend Prediction

Leveraging advanced AI algorithms, it performs real-time analysis of diverse market data—including crypto assets, stocks, and forex—to deliver precise trend predictions and risk assessments. This empowers investors to identify and capitalize on global opportunities.

Intelligent On-Chain Treasury Fund

This smart contract-based on-chain treasury executes AI-driven trading strategies to automatically invest in tokenized assets of high-quality projects on DEXs, ensuring transparency, security, and decentralization.

AIREV On-Chain Investment Advisor

Combining AI intelligence + RWA on-chain, users can easily own Bitcoin, participate in the global market, and truly realize Web3 wealth management that everyone can invest in and enjoy for everyone

AIREV On-chain Investment Advisory: Building a new generation of AI-powered on-chain investment advisory platform

- **Obtain by setting up LP**
- **Shared by users to build LPs and Cai Ku Fund**
- **Launch AI Application**
- **Ecosystem Development**

4.76%

AIREV

95.24%
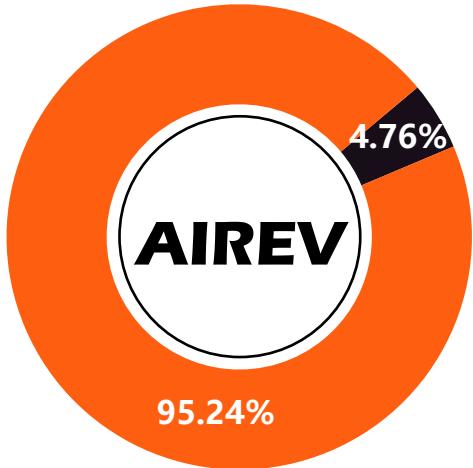

Initial LP Setup

10 million AIREV tokens were allocated for initial LP deployment to ensure liquidity. The LP relinquished minting rights, and upon activation of the Simon Singularity, ownership will be transferred to the DAO fund.

Cast using the stake pool quota

200 million AIREV tokens were minted through LP and AI Treasury Fund allocations to secure stake in the mining pool, with a fair distribution across the network.

Total AIREV Supply: 210 million, with final circulating supply deflating toward approximately 21 million

Economic System Balance: Dynamic deflation coefficient adjustment formula: When AIREV quantity ≥ 21,000,000

LP pool deflation rate: 2% daily-2% of LP pool circulation volume enters black hole address daily for destruction, gradually reducing final circulation to 21 million coins.

Simon's Singularity: When AIREV/BTCB liquidity pool reaches $500, the singularity activates, transitioning mining pool quotas from gold standard to coin standard, initiating PancakeSwap secondary market trading.

AI REVOLUTION DAO LP MINTING AUTHORITY RULES

AIREV

How to Add LP to Obtain Minting Rights?

AIREV obtains minting rights by adding LP. By sending USDT to the AIREV contract address on the BSC chain, the contract will automatically add AIREV/BTCB to the liquidity pool, granting LP minting rights and providing AIREV mining allocation.

→

Detailed LP Minting Rules

Underlying Public Chain: BSC Chain

Minimum Investment: 10USDT

LP Liquidity Pool: AIREV/BTCB

Minting Quota: Investment Amount Sent to Contract Address × N (Multiplier)

Minting Method: POS Staking Mechanism

Daily Minting Volume: Minting Quota × 1% × DEI Index / AIREV Price of the Previous Day

N: Minting allocation multiplier, $1 \leq N$; N is related to the DEI

DEI Index: The dynamic DEI index model (VMSAP) calculates a "Supply-Demand Balance Index" weekly based on five indicators. The balance index ranges from 0.5 to 1.2 — the POS mining cycle for a single stake ranges from 66 to 200 days. DEI (Dynamic Emission Index) — for the detailed model, see the AI Revolution DAO White Paper.

AI REVOLUTION DAO RULES FOR SELLING AIREV TO OBTAIN BITCOIN

- BTCB

10% 10% 10% 70%

AIREV

Special Notes:

When AIREV reaches 21 million in circulation, it will no longer be destroyed. 10% of AIREV's value will be exchanged for miniAI. When the LP value of AIREV/BTCB in Pancake SWAP reaches $5 million and the Simon Singularity is triggered, Pancake SWAP on the secondary market will be activated. The equity mining pool will settle in coin terms, and AIREV will fully enter the value minting phase. The explanation is based on the DAO voting resolution.

AI REVOLUTION DAO COMMUNITY INCENTIVE PROGRAM

Invite Users to Earn AIREV Rewards

Invite community members to deposit USDT to the AIREV contract address. When adding LPs to the AI Treasury Fund, they will receive an invitation reward from the mining pool. Additionally, invited users will earn a 10% transaction fee when depositing AIREV into the AIREV contract address.

Invitation Reward Rules:

01 Direct Invitation:

AIREV equivalent to 3% of the USDT amount deposited by directly invited users

3% of the amount of AIREV deposited by invited users into the AIREV contract address

02 Indirect Invitation:

AIREV equivalent to 2% of the USDT amount deposited by indirectly invited users.

2% of the amount of AIREV deposited by indirectly invited users into the AIREV contract address.

For example: User A invites User B, and User B invites User C. If User C deposits 1,000 USDT into the AIREV contract address, then User B will receive AIREV equivalent to 1,000 * 3% = 30 USDT, and User A will receive AIREV equivalent to 1,000 * 2% = 20 USDT

AI REVOLUTION DAO COMMUNITY INCENTIVE PROGRAM

60%

40%

NODE AIREV REWARD POOL

LIGHT Node Reward Pool

Receive 60% of the total node reward pool amount

SUPER Node Reward Pool

Receive 40% of the Node Reward Pool Amount

The network will allocate 5% of newly deposited USDT to AIREV tokens and 5% of AIREV deposits to the AIREV contract address as transaction fees to the node reward pool. Additionally, 5% of weekly profits from the AI Chain Treasury Fund will be allocated to the node reward pool.

Node Pool Reward Distribution Rules

Node Reward Calculation Rule: Node Weight Ratio ✕ Corresponding Node Pool Asset Amount

Node Weight Ratio Calculation: Total USDT deposits added by single-node invitation chains in 30 generations / Total USDT deposits added by all qualified node invitation chains

Node Pool Reward Distribution Rule: For every 100 USDT deposits added to the network, AIREV contract settlement will be executed once, with the node reward pool distributing rewards to all qualified nodes.

AI REVOLUTION DAO COMMUNITY INCENTIVE PROGRAM

NODE PROMOTION RULES

LIGHT NODE
PROMOTION RULES

Condition:

The third-generation memory chain has reached a total USDT supply of 20,000, with the top 100 nodes in the ranking.

SUPER NODE
PROMOTION RULES

Condition:

The third-generation invitation chain has reached a total USDT deposit of 100,000, with the top 21 nodes meeting the standard.

TOP Ranking: Nodes meeting the criteria.

The invitation chain introduces a total USDT deposit contribution weight ranking.

For every 100 USDT deposits to the AIREV contract across the network, a node weight ratio is calculated. The top 100 LIGHT node weight ratios constitute the TOP ranking, while the top 21 SUPER node weight ratios form the TOP ranking. SUPER nodes do not receive LIGHT node rewards. Adjustments will be made according to DAO proposals.

Community VIP Level-Up and Reward Rules

Community contribution levels are divided into V1–V9 based on performance assessments within the referral chain.

Members receive rewards from new USDT deposits into the AIREV contract and dividend rewards from the AI Treasury Fund.

Reward for Newly Deposited USDT into the AIREV Contract

The reward is calculated based on the total new USDT deposits into the AIREV contract address by users in the referral chain, multiplied by the corresponding level reward coefficient. Equivalent AIREV rewards are then distributed from the mining pool.

AI Treasury Fund Dividend Reward

Each VIP level's users share the corresponding AI Treasury Fund dividend pool equally. (Fund profits are distributed to the respective VIP dividend pools based on the profit base multiplied by the corresponding VIP pool coefficient. Rewards are settled weekly in USDT.)

AI REVOLUTION DAO COMMUNITY INCENTIVE PROGRAM

Community VIP Tier & Reward Rules

Community Contribution Levels V1–V9 Assessment Criteria: Remove the community with the highest total USDT deposits to the AIREV contract from the referral chain (i.e., the largest community). The total USDT deposits from users in all other referral chain communities to the AIREV contract are counted as performance for assessment (i.e., sub-community performance). For VIP1, the assessment requires 5 active users and a sub-community performance of 1,000 USDT.

PERFORMANCE ASSESSMENT TABLE
(All sub-community performance from users in the referral chain who newly deposit USDT into the AIREV contract)

VIP LEVEL	Performance Appraisal (Community Performance)	Added USDT Deposit Reward Ratio	AI Treasury Fund Dividend Pool Base Corresponding Ratio
V1	1000 USDT	5%	5%
V2	10000 USDT	8%	3%
V3	30000 USDT	10%	2%
V4	100000 USDT	12%	1%
V5	200000 USDT	14%	1%
V6	500000 USDT	16%	1%
V7	1000000 USDT	18%	1%
V8	2000000 USDT	20%	0.5%
V9	5000000 USDT	22%	0.5%
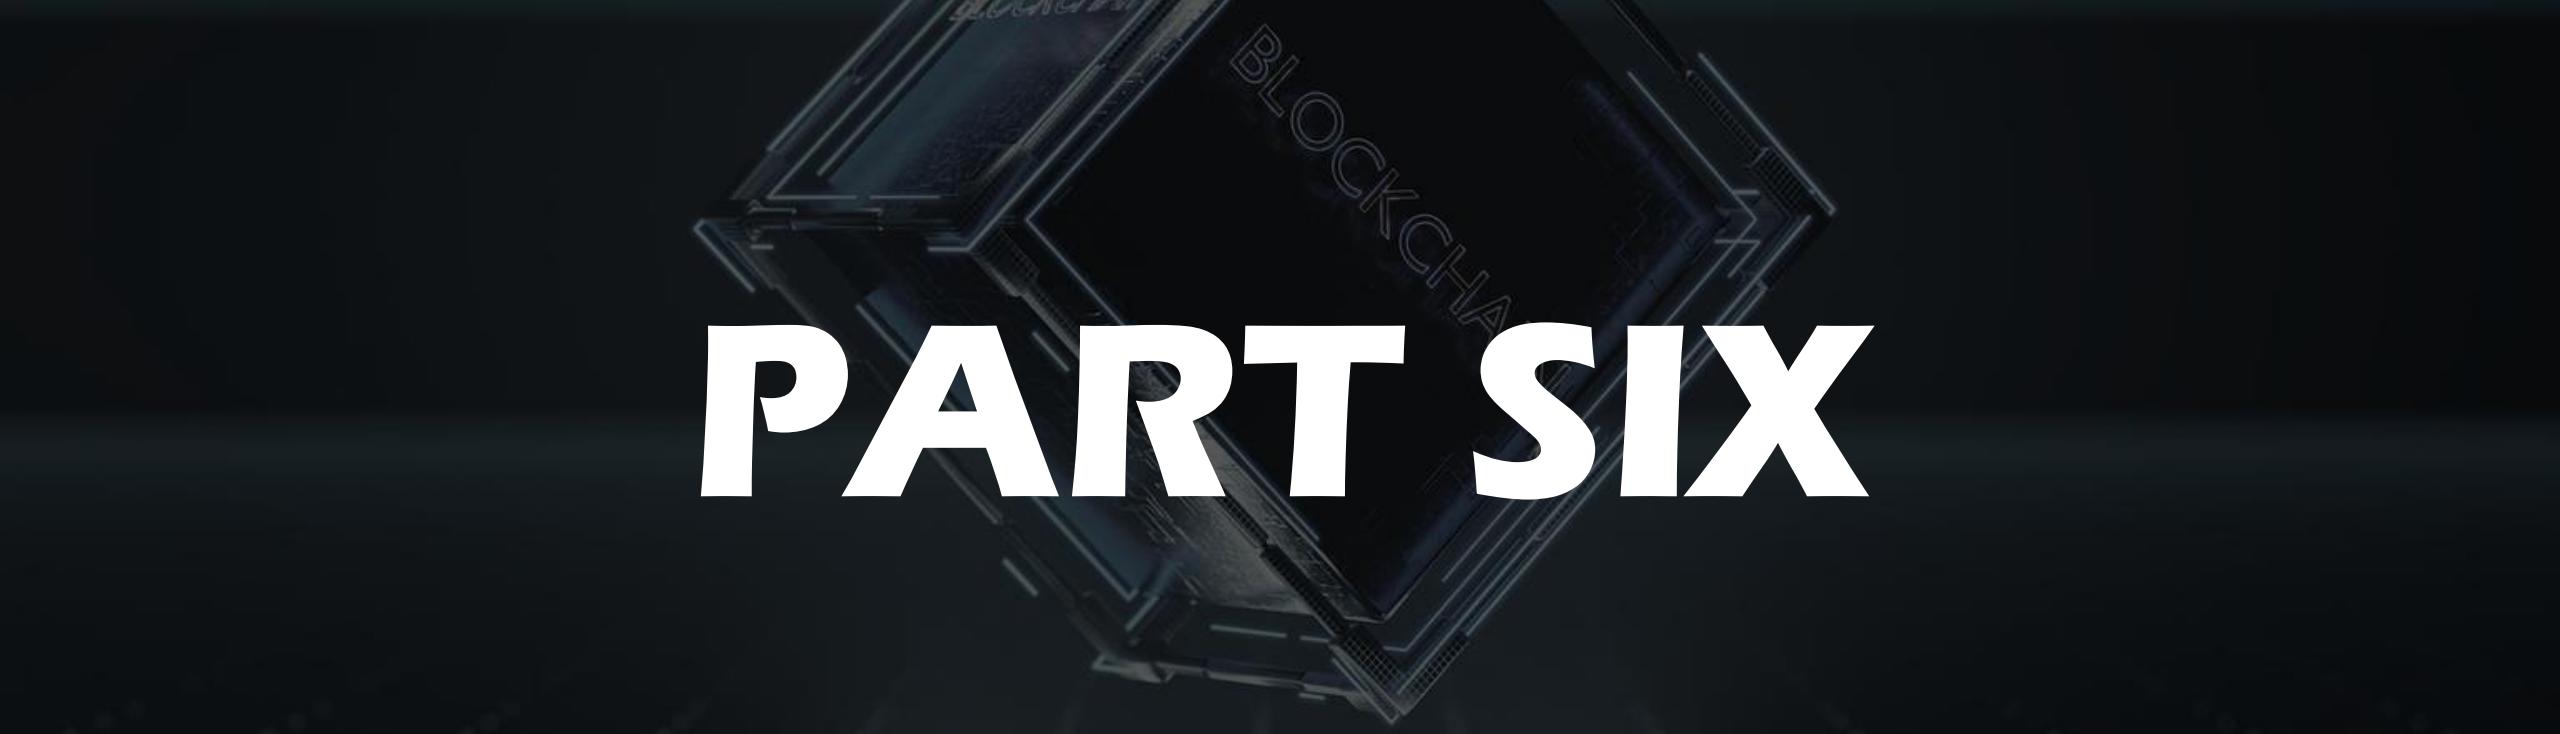

PART SIX

ECO-TECHNOLOGY PATH

Ecosystem Symbiosis between miniAI Payment Token and AIREV

miniAI Payment and Settlement Token

The miniAI payment token enables users to purchase AI products and services from the AI Revolution community, while earning 60% of AIREV mining rewards. This mechanism facilitates value circulation between consumption and data, fostering a symbiotic ecosystem.

miniAI Swap

When users exchange USDT or AIREV for miniAI, 60% of the value is returned to the mining pool as equity, 30% is used to pay for computing power, and 10% of the AIREV value goes into the DAO treasury for community rewards.

AIREV Exchange Amount

AIREV/USDT

(miniAI Pegged Value:1 miniAI =1USDT)

AIREV to miniAI SWAP

Users will receive a mining allocation equivalent to 60% of the AIREV value

AI REVOLUTION DAO

DIGITAL EARTH

Support one-click generation of any city worldwide or any virtual object — with just a click, you can create your own world. For example, on a digital Earth, select any area smaller than one square kilometer, and AI will quickly and automatically generate a real-time 3D scene of that area, making virtual city creation effortless and fully free.

The twin world of AI Revolution DAO's Digital Earth will use cutting-edge Generative AI technology to build a digital twin of Earth, combining AI + Web3 + DePIN + RWA to achieve real-world to virtual mapping.

AI agents create digital cities

HOW TO PARTICIPATE IN AI REVOLUTION DAO?

Be an AI computing power network infrastructure builder and data provider

Be the creator of AI Agent

Angel investors in AI applications and holders of AIREV governance tokens

PURCHASE AI APPLICATIONS

CREATE AI APPLICATION

HOLD AIREV TOKENS

Build globally distributed computing nodes to support efficient operation of AI models

Build an open platform to attract global developers to collaboratively create diverse AI Agent + RWA solutions

Participate in investment opportunities across various AI Agents, supporting the large-scale adoption of AI Agent applications and the realization of wealth value. The more diverse the AI Agent applications, the faster the circulation, the faster the deflation, and the higher the value of AIREV.
